

**INDUSTRY: Aerospace & Industrial****WEBSITE: centrix-us.com****ABOUT CENTRIX INC.**

Founded in 2001, Centrix has earned a reputation as a leader in engineered fastening solutions for the Aerospace Industry. Their dedicated team designs temporary fasteners, flightworthy fasteners, and tooling – all manufactured under the stringent quality assurance standards of ISO 9001 and AS9100 Rev D. Centrix serves customers in over 15 countries and their solutions support every new major aircraft platform globally.

”

The confidence that I now have in going into my AS9100 audit is amazing. I don't worry about calibration, Xemelgo is going to be right there with me.”

— Dawn Fechtel, Director of Quality

Centrix saved time and eliminated compliance risk

OVERVIEW

At Centrix, exceptional product quality is non-negotiable. To ensure excellence under their Quality Management System, Centrix must regularly calibrate their measurement and monitoring equipment used in production and the company is regularly audited to verify compliance to regulatory requirements, and routinely undergoes rigorous third-party audits to verify their compliance.

CHALLENGES

- **Wasted time.** Team members spent countless hours tracking down missing and past-due calibrated tools on the shop floor each week.
- **Error-prone process.** The legacy system of spreadsheets to manage tool calibration was difficult to use and prone to manual error.
- **Compliance risk.** A single missing or out-of-calibration tool can result in a 'major' finding from auditors and risk the loss of ASQ/ ISO certifications.

SOLUTION

By implementing Xemelgo's cloud-based asset management solution, Centrix streamlined its calibrated tool management process in an afternoon, saving time while eliminating quality compliance risk.

BENEFITS

- **Maximized productivity.** Low-cost RFID tags make every tool easy to find using an RFID handheld scanner, saving hours each week.
- **Automated tool management.** The Centrix Quality team stays up-to-date on calibration with automated monitoring of calibration status and alerts.
- **User friendly.** Centrix onboarded hundreds of calipers, gauges, and other tools in hours, gaining immediate value from Xemelgo's intuitive software.
